# Benjamin Graham

# Carnegie Mellon Electrical and Computer Engineering

Class of 2022

# **Experience**

2020

Software Engineering Intern

Redhat

- Worked on the Cockpit Session Recording module to provide a web interface for the tlog application. The interface was updated to use the React library for PatterFly 4, and the repository was updated to use continuous integration using Docker.
- Updated the authentication application FreeOTP to support backup and restore features on Android

2019

Undergraduate Research Assistant

Cylab Security and Privacy Institute

- Worked with Northrup Grumman on the development of visualization tools to detect and monitor the distribution of malicious software.
- Implemented a augmented reality haptic system for first responders for the NIST haptic challenge. The entry received first place in the NIST Haptic Interface for Public Safety Challenge.
- Developed a web application to graphically model the behavior of artificial intelligence algorithms.

2018

#### CERT Security Automation Intern

Software Engineering Institute

 Used Python and Angular for web application development for simplified SiLK internet traffic analysis.

2015 -2017

#### Software Intern

Carnegie Mellon Robotics Institute

- Wrote software using Swift and Metal for displaying interactive 3D data on mobile devices under the supervision of Professor Simon Lucey.
- Wrote Python and Matlab code for use in a 3D image camera calibration system under the supervision of Professor Fernando De la Torre.
- Designed, 3D printed, and assembled a robot under the supervision of Professor Alonzo Kelly.

# Projects

Aug. 2020 present C Compiler

Developing a C compiler for CMU's Compiler Design course, written in Ocaml.

Mar. 2020 present

- X Window Manager
- Made a functional tiling window manager for the X Window System.

Mar. 2019 present

# Python AOT Compiler

 Developing a compiler and runtime environment for Python to improve its speed and memory usage.

Mar. 2019

#### Com-Unity Web Application

- Created a inter-dorm request application for SteelHacks using Node.js.
- Won Snapchat prize for best social media integration.

Nov. 2018

### PyDoom Video Game

- Developed a 90's style first person video game inspired by the likes of Doom and Quake.
- Won 1st prize overall at the 15-112 Project Showcase.

2017

# Kathode Android Game

- Released a rhythm-based video game on the Google Play Store.
- Developed using Java and Android Studio.

# | Education

2018 present

# Carnegie Mellon University

- Student in Electrical and Computer Engineering.
- Relevant courses include Compiler Design Distributed Systems Parallel and Sequential Data Structures and Algorithms - Introduction to Computer Security -Software Engineering for Startups - Introduction to Computer Systems - Structure and Design of Digital Systems - Functional Programming - Principals of Imperative Computation - Concepts of Mathematics - Fundamentals of Programming.
