## Benjamin W. Graham

## Carnegie Mellon Electrical and Computer Engineering

Class of 2022

# **Experience**

2019 present

### Founder

Beneficium LLC

 Developing an AOT compiler and runtime environment for Python to improve its speed and memory usage.

2020

#### Software Engineering Intern

RedHat

- Updated the Cockpit Session Recording module to provide a web interface for the tlog application. The interface was moved to the React library for PatterFly 4, and continuous integration was added to the repository using Docker.
- Implemented backup-and-restore functionality for the authentication application FreeOTP on Android.

2019

### Undergraduate Research Assistant

Cylab Security and Privacy Institute

- Built a visualization tool to detect and monitor the distribution of malicious software in a partnership with Northrup Grumman.
- Implemented an augmented reality haptic system for first responders for the NIST haptic challenge. The entry received first place in the NIST Haptic Interface for Public Safety Challenge.
- Developed a web application to graphically model the behavior of artificial intelligence algorithms.

2018

#### ♦ CERT Security Automation Intern

Software Engineering Institute

 Used Python and Angular for web application development for simplified SiLK internet traffic analysis.

2015 -2017

#### Software Intern

Carnegie Mellon Robotics Institute

- Wrote software using Swift and Metal for displaying interactive 3D data on mobile devices under the supervision of Professor Simon Lucey.
- Wrote Python and Matlab code for use in a 3D image camera calibration system under the supervision of Professor Fernando De la Torre.
- Designed, 3D printed, and assembled a robot under the supervision of Professor Alonzo Kelly.

## **Projects**

2020 present

#### C Compiler

• Developing a C compiler for CMU's Compiler Design course, written in Ocaml.

2020 present

## X Window Manager

Made a functional tiling window manager for the X Window System.

2019

## Com-Unity Web Application

- Created a inter-dorm request application for SteelHacks using Node.js.
- Won Snapchat prize for best social media integration.

2018

#### PyDoom Video Game

- Developed a 90's style first person video game inspired by the likes of Doom and Quake.
- Won first prize overall at the 15-112 Project Showcase.

2017

#### Kathode Android Game

- Released a rhythm-based video game on the Google Play Store.
- Developed using Java and Android Studio.

## Education

2018 present

## Carnegie Mellon University

- Student in Electrical and Computer Engineering.
- Relevant courses include Compiler Design Distributed Systems Parallel and Sequential Data Structures and Algorithms - Introduction to Computer Security -Software Engineering for Startups - Introduction to Computer Systems - Structure and Design of Digital Systems - Functional Programming -

#### Github

github.com/benwilliamgraham

- RedHat "Achievement of Awesome"
- First place in the NIST Haptic Interface for Public Safety Challenge
- Snapchat Prize for Social Media Integration at SteelHacks
- 15-122 Project Showcase winner
- First prize at Hack112
- Duquesne Award for Computer Science at PJAS

## Languages

**9** 

C++ Python

Ocaml

Javascript

👙 Java

x86 Assembly

#### Libraries and Frameworks

React

Node.js

OpenGL

OpenGL

OpenCV

Unreal EngineAngular

#### **Platforms**

♣ Linux

Windows
Android

i IOS

Raspberry Pi
Arduino

## Software

Git

HTC Vive

Android Studio

Fusion 360
